GROUP ASSIGNMENT
DATA CURATION AND MANAGEMENT PLAN
PRESENTATION DUE ON 19TH AUGUST 2024

Table 1: Assignment details

Sno	Task	Group
1	Adopt any official website from the "internet of things" and make a compelling case for the organization to adopt metadata tailored to the website. Present your proposal to such an organization.	Metadata
2	Data preprocessing is central to data warehousing. Unfortunately, most organizations are only interested in "data piling" without due diligence. Develop a data preprocessing advocacy plan for any organization of your choice, offering a clear roadmap for its uptake.	Data Preprocessing
3	Language Models (LMs) have transformed the world of unstructured data. Present a brief history of LMs and demonstrate how their emerging abilities can revolutionize the field of data curation and management.	LMs
4	Open data sources are unlocking unprecedented collaboration, transparency, and accountability in the data landscape. Identify some of the global open data sources and demonstrate how to access data from at least two sources.	Open sources
