COLLEGE OF HUMANITIES AND LEGAL STUDIES
SCHOOL OF ECONOMICS
DEPARTMENT OF DATA SCIENCE AND ECONOMIC POLICY
TERM PAPER 2024/2025
DATA CURATION AND MANAGEMENT PLANS**

ATTEMPT ALL QUESTIONS

1. Discuss the ethical challenges associated with data curation in the age of big data and AI. Propose a governance framework that can balance accessibility, privacy, and responsible data use.
2. Compare two widely used metadata standards (Dublin Core and Data Documentation Initiative). How do such standards enhance interoperability across institutions, and what limitations might organizations face in adopting them?
3. With the rise of cloud computing and distributed systems, how is the role of data archiving evolving? Critically assess the benefits and risks of cloud-based archiving solutions for long-term data preservation.
4. Evaluate the opportunities and risks of automating data preprocessing workflows using machine learning techniques. How can organizations ensure reliability while maintaining human oversight?

NOTE: Submit via raykofieli@gmail.com not later than 5th October 2025.
